PROFESSIONAL SUMMARY

Platform and DevOps Engineer with 4+ years of experience designing and operating CI/CD pipelines, Kubernetes-based infrastructure, and AI workload platforms across cloud and edge environments. Hands-on with containerized deployments, GitLab runner orchestration, and MLOps tooling (MLflow) for teams training and fine-tuning production models. Proven track record of automating infrastructure, reducing deployment effort significantly, and delivering reliable systems at scale. Open to relocation for the right opportunity.

EXPERIENCE

- **Raphe mPhibr Pvt. Ltd.** Oct 2025 – Present
Software Research Engineer - AI and Platform Infrastructure Noida, India
 - Managing and load-balancing GitLab Runners across multiple servers, ensuring high availability and consistent CI/CD throughput for autonomous systems workloads.
 - Establishing MLflow infrastructure to support AI teams in tracking experiments, versioning models, and managing fine-tuning workflows for open-source and in-house LLMs.
 - Architecting and deploying a single-node Docker Compose environment for an AI application stack comprising a frontend, backend, Vision Language Model (VLM), and Segment Anything Model (SAM); currently migrating to Kubernetes.
 - Designing dual deployment strategy for the AI application stack — edge deployment for on-device inference and standard cloud deployment for internal platform use.
 - Conducting system benchmarking to evaluate inference performance and resource utilization across GPU-accelerated workloads.
- **Fineshift Software Pvt. Ltd.** Nov 2024 – Oct 2025
DevOps Engineer (Forward Deployed at Raphe mPhibr) - CI/CD Infrastructure Pune, India
 - Forward deployed at Raphe mPhibr to build and automate their platform infrastructure; directly contributed to the client engineering roadmap and was subsequently hired full-time.
 - Built scalable CI/CD infrastructure using GitLab Runners and Docker, enabling automated build, test, and release workflows for simulation-heavy drone programs.
 - Developed a virtual swarm simulation platform capable of running 50+ concurrent drone instances, integrating ArduPilot, QGroundControl, and MissionPlanner in a headless environment.
 - Automated log analysis, SFTP-based log storage, and reporting pipelines, significantly reducing manual debugging effort across simulation test cycles.
- **Datamato Technologies Pvt. Ltd.** Apr 2022 – Nov 2024
Engineer - CI/CD and Automation Pune, India
 - Designed and delivered One-Click deployment automation using GitLab CI/CD and Shell scripting, reducing deployment effort by up to 90% across database and filesystem release workflows.
 - Led CI/CD automation for enterprise applications using Jenkins, SonarQube, and Nexus, cutting release cycle times by 60% and reducing manual operations by over 75%.
 - Deployed and managed 20+ microservices on AWS EKS using Kubernetes, Helm, Docker, and Nginx Ingress, improving platform reliability and scalability by up to 80%.
 - Integrated 45+ application modules into unified CI/CD pipelines, streamlining multi-project delivery for application and platform teams.

PROJECTS

- **Sentinel AI - Local Error Monitoring Agent** | Python, Ollama, LLM, CLI 2025
 - Built an intelligent log monitoring agent that watches log files in real time, analyzes errors using local LLMs via Ollama, and caches results to eliminate redundant API calls. Ships as an installable Python package with a CLI.  GitHub
- **AI Application Stack - Edge and Cloud Deployment** | Docker Compose, Kubernetes, VLM, SAM 2025
 - Deployed a multi-model AI application (frontend, backend, Vision Language Model, Segment Anything Model) using Docker Compose for single-node use; migrating to Kubernetes with separate edge and cloud deployment targets. *Internal Project*
- **Drone Simulation CI/CD Infrastructure** | Linux, GitLab, Docker, ArduPilot, Python 2024 – 2025
 - Built a containerized CI/CD platform supporting 50+ concurrent drone simulation instances using GitLab Runners and Docker; integrated ArduPilot and QGroundControl in a headless environment with automated SFTP log capture. *Internal Project*
- **Three-Tier Application on AWS EKS** | React, Node.js, MongoDB, Docker, AWS EKS, ALB 2023 – 2024
 - Deployed a containerized full-stack application on Amazon EKS with ALB ingress, ECR image delivery, and production-grade Kubernetes orchestration.  GitHub
- **Java Maven Sonar Docker K8s CI/CD Pipeline** | Java, Jenkins, SonarQube, Docker, Kubernetes 2023
 - Implemented an end-to-end delivery pipeline for a Spring Boot application combining build automation, SonarQube quality gates, Docker packaging, and Kubernetes deployment.  GitHub

SKILLS

- **Languages and Scripting:** Python, Bash/Shell, Java, YAML
- **CI/CD and Automation:** GitLab CI/CD, Jenkins, GitHub Actions, SonarQube, Nexus
- **Containers and Orchestration:** Docker, Kubernetes (EKS, self-managed), Helm, Docker Compose
- **Cloud Platforms:** AWS (EC2, S3, VPC, IAM, EKS, Fargate, ALB, Lambda, ECR)
- **MLOps and AI Infrastructure:** MLflow, GPU workload management, model serving, edge inference deployment
- **Infrastructure as Code:** Terraform
- **Monitoring and Observability:** Prometheus, Grafana
- **Operating Systems and Networking:** Linux (Ubuntu/CentOS), Nginx, DNS, Load Balancing, VPC Networking

CERTIFICATIONS

- GitLab Certified Services Engineer Professional *May 2024*
- GitLab Certified CI/CD Associate *Aug 2024*
- GitLab Certified Project Management Associate *Apr 2024*
- GitLab Certified Git Associate *Apr 2024*

EDUCATION

- **Chandigarh University, Mohali, Punjab** 2022 – 2024
Master of Computer Applications *CGPA: 7.50 / 10.00*
- **Dr. Panjabrao Deshmukh Krishi Vidyapeeth (PDKV), Akola** 2017 – 2021
Bachelor of Science (Hons) *CGPA: 7.67 / 10.00*
